What the programmer is finishing

Carmon Oil is a premium inquiry-led B2B/B2C lubricant catalogue — not checkout-first ecommerce. The site helps drivers, workshops, fleets, distributors and export buyers find a product and start a supply conversation.

POSITIONING

Made in Korea · Trusted Worldwide

Direct supply of selected Korean and global lubricant brands from South Korea, with product selection, destination and export coordination.

COMMERCIAL MODEL

No public product prices. Use “Price on request”, “Request a product list” and “Request a B2B quote”.

Brand direction

PALETTE

Deep navy, warm white and orange action accents.

TYPE

Modern sans-serif with strong editorial display scale.

IMAGES

Distinct high-quality photography per major section. Do not reuse similar backgrounds.

Verify product specifications, approvals, OEM references, commercial claims, certifications, partner status and image/logo rights before production launch.

Pages and user journeys

01	Home	Hero, Section 2 logistics statement, routes, categories, animated brands, logistics, catalogue, presentation, finder, CIS delivery, articles, FAQ and inquiry form.
02	Products	Dropdown: Passenger Oil, Heavy-Duty Oil, Transmission Oil, Other Oils. Each opens the selected product line-up.
03	Brands	Dropdown: Compare Brands, Kixx, Hyundai XTeer, SK ZIC, Castrol, S-OIL, Shell, SpeedMate, Mobil, Autous and Hyundai Mobis.
04	Compare Brands	Filters by brand, oil type, viscosity, application/fuel and availability.
05	Brand pages	Logo, description, benefits, statistics, product types, viscosities, applications, confirmed products and request CTA.
06	Logistics	Four-step supply route, export support, documentation, loading coordination and delivery markets.
07	For Business	Wholesale/export form with company, destination, contact and requirements. Telegram integration remains paused.
08	Presentation	Premium page with cover, description, presentation points, embedded presentation and B2B CTA.
09	Resources	Four answer pages: viscosity; fuel type; genuine product; delivery across CIS.

Real products and visible data

Six product records are based on supplied product photos. Keep values marked VERIFY until checked against official technical sheets.

PRODUCT	VISCOSITY	FUEL	VISIBLE DATA	ACTION
1. Hyundai XTeer TOP PAO C3 5W-30 1L Hyundai XTeer · 1L	5W-30	diesel,gasoline	PAO based · 100% fully synthetic · ACEA C3 · ILSAC GF-6 · MB 229.51	VERIFY technical sheet
2. Hyundai XTeer TOP PAO C5 0W-20 1L Hyundai XTeer · 1L	0W-20	diesel,gasoline	PAO based · 100% fully synthetic · ACEA C5 · ILSAC GF-6 · MB 229.71	VERIFY technical sheet
3. SK ZIC X7 5W-30 1L SK ZIC · 1L	5W-30	diesel,gasoline	Fully synthetic · VHVI technology · SAE 5W-30	VERIFY technical sheet
4. SK ZIC X7 0W-30 1L SK ZIC · 1L	0W-30	diesel,gasoline	ZIC X7 · SAE 0W-30 · 1L packaging	VERIFY technical sheet
5. SK ZIC X9 LS 5W-30 1L SK ZIC · 1L	5W-30	diesel,gasoline	X9 LS · Low SAPS · Fully synthetic · SAE 5W-30	VERIFY technical sheet
6. SK ZIC X9 LS 5W-40 1L SK ZIC · 1L	5W-40	diesel,gasoline	X9 LS · Low SAPS · Fully synthetic · SAE 5W-40	VERIFY technical sheet

Product behaviour

PRICE

Show “Price on request”.

DETAIL

Photo, viscosity, packaging, application, specifications and CTA.

FINDER

Brand + viscosity + application returns a shortlist.

Current local demo: 6 products — 2 Hyundai XTeer and 4 SK ZIC. Expand only with approved data.

Supplied real product photos

Use these packshots as the current catalogue source of truth. Keep the clean light background and do not replace them with generic bottles.

SK ZIC · 5W-40 · 1L

Image treatment

- Center and contain product images; do not crop caps or labels.
- Use a light neutral product stage for cards and a contained large image in detail.
- Tie claims to visible labels or approved technical sheets.
- Do not infer missing approvals or OEM status from marketing copy alone.

Premium Korean Engine Oil Powering Performance Across Central Asia

SECTION 2

Improving B2B and B2C Markets with Premium Engine Oils and Reliable Global Logistics.

CTAS

Explore Products · For Business & Export · Request a Quote · Request a Product List · Message on Telegram

Integration boundaries

✓ Telegram username updated everywhere.

✓ Telegram Request a Quote integration paused.

✓ Never expose a bot token in frontend code.

✓ Use protected backend later.

Preserve this system

Frontend

- Hash routes for Home, Products, Brands, Logistics, Business, Presentation and articles.
- Products and Brands are functional dropdown menus.
- Product and brand choices open filtered line-ups/dedicated pages.
- Presentation has premium page plus embedded/fullscreen option.
- Good-to-know cards open answer pages.

Responsive

- Viewport meta required.
- Desktop nav controls share 38px height and baseline.
- Mobile nav stacks and exposes dropdown items.
- Finder switches to one-column on small screens.
- Presentation iframe and articles have mobile rules.

Source files

index.html · web.js · web.css · assets/i18n.js · products.json · assets/

Current shareable preview

<https://strawberrybrowser.com/files/2w2ZqFVzk47IJYXq>

Use it as visual reference. The next project needs its own deployment, backend and verified production data.

All project visual assets

Contact sheet of supplied logos, photography and carousel images. Original files remain in the local project folder and should be copied into the programmer's repository with rights/source notes.

Before production launch

01 Confirm six product specifications.	02 Confirm viscosity, packaging and variants.
03 Confirm logo/image rights.	04 Confirm claims, certifications and OEM references.
05 Confirm warehouse/port imagery.	06 Confirm delivery countries and wording.
07 Connect inquiry form to approved destination.	08 Keep Telegram token server-side.
09 Test all routes and dropdowns.	10 Test desktop, tablet and real mobile.
11 Test product photos and presentation iframe.	12 Recheck English copy and contacts.

HANDOFF PRINCIPLE

Build from verified data, not assumptions.

This is a visual and structural reference. Treat Canva previews, generated copy, market figures and unverified technical claims as presentation material until approved for production.
